SACHIN PANDEY

Junior DevOps Engineer | CI/CD | Cloud (AWS) | Infrastructure as Code | Kubernetes

+91 8755953877 | sachinpandey6724@gmail.com | GitHub: https://github.com/Sachin001234 | LinkedIn: https://www.linkedin.com/in/sachin-pandey-0bb651351/ | Portfolio: https://devops-portfolio-roan.vercel.app

PROFESSIONAL SUMMARY

DevOps-focused BCA graduate (2026) with hands-on experience building CI/CD pipelines, containerized deployments, Infrastructure as Code, and GitOps workflows. Skilled in Docker, Kubernetes, Jenkins, GitHub Actions, Argo CD, Terraform, Ansible, and AWS (EC2, ECR), with monitoring experience using Prometheus and Grafana. Seeking an entry-level DevOps Engineer role to automate build and deployment workflows, improve release reliability, and support scalable cloud infrastructure.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, ECR, [S3, IAM, VPC, CloudWatch: add only if used]), GCP
- **CI/CD & GitOps:** CI/CD Pipelines, Jenkins, GitHub Actions, Argo CD, GitOps
- **Containers & Orchestration:** Docker, Docker Compose, Kubernetes, Helm, Container Registry (ECR, GHCR)
- **IaC & Configuration Management:** Terraform, Ansible, Infrastructure as Code (IaC)
- **Scripting & OS:** Python, Bash/Shell Scripting, Linux (Ubuntu), YAML
- **Monitoring & Observability:** Prometheus, Grafana
- **Code Quality & Artifacts:** SonarQube, Nexus
- **Version Control:** Git, GitHub, GitLab, Webhooks
- **Practices:** DevOps, Automation, Containerization, Continuous Integration, Continuous Delivery

PROJECTS

vLLM DevOps Platform with GitOps | [https://github.com/Sachin001234/vllm-platform,]

Technologies: GitHub Actions, Docker, Kubernetes, Argo CD, Prometheus, Grafana, GitHub Container Registry

- Structured separate application and GitOps repositories for a vLLM-based AI inference platform.
- Developed GitHub Actions workflows for automated testing, Docker image building, and publishing images to GitHub Container Registry.
- Configured Kubernetes deployment resources and Argo CD applications for GitOps-based deployment management.
- Worked on Prometheus and Grafana monitoring dashboards for the platform.
- Developed a React-based interface for interacting with the AI inference service.

Jerney: DevOps CI/CD Pipeline | [https://github.com/Sachin001234/Jerney]

Technologies: Jenkins, Docker, AWS EC2, Amazon ECR, SonarQube, Nexus, GitHub

- Worked on the DevOps implementation of a blog platform with a React frontend, Node.js backend, and PostgreSQL database.
- Configured GitHub webhook integration with Jenkins to trigger automated builds following code pushes.
- Worked with SonarQube for code quality analysis and Nexus for artifact management.
- Used Docker and AWS services as part of the application's containerization and deployment workflow.

Cloud-Native Voting App Automation | [https://github.com/Sachin001234/voting-devops]

Technologies: Docker Compose, Terraform, Ansible, Python, Bash, Linux, AWS

- Deployed a five-service voting application locally using Docker Compose, including Vote, Result, Worker, Redis, and PostgreSQL.
- Worked on infrastructure provisioning with Terraform and server configuration automation with Ansible.
- Used Python, Bash, and Linux to support infrastructure automation and application deployment workflows.

EDUCATION

Bachelor of Computer Applications (BCA), 2023 to 2026

Shri Ramswaroop Memorial University, Lucknow, Uttar Pradesh | CGPA: 7.66/10

CERTIFICATIONS

- AWS Cloud Practitioner & Architecture (Udemy course completion certificate)
- DevOps (Udemy course completion certificate)
